

In a flash an auto accident can happen. Roads, highways and side-streets are overrun with hazardous vehicular traffic. Think ahead, and use reflective safety products to help reduce the likelihood of collisions.

Tri-Mag® Reflector
RF-329 (Patented)

If you are parked or stuck on a highway or byway, your vehicle is less likely to be struck by passing traffic when you use **TRI-MAG® REFLECTORS**. This set of 3 reflective red triangles is custom imprinted on the largest triangle. They hold magnetically to all vehicles, or with removable self-sticking tape (included) to fiber cars. Black imprint appears along the base of the large triangle.

RF-329 Tri-Mag® Reflectors come packaged one set per vinyl pack with assembly and usage instructions and store easily in your trunk.

The center triangle may be used as a Zipper Pull for the motorist. Ball Chain (unassembled) is included.

The RF-733 Pennant comes with 4 additional reflectors

RF-733 Pennant

Autenna® Reflectors RF-733 Pennant; RF-732 Flag (Patented)

Recognize your car instantly in a parking lot with this bright self-sticking **AUTENNA®** reflector. However, more important, if you break down on the roadside, the reflector will light up in the headlights of approaching vehicles, making your car more noticeable and less likely to be struck. These **AUTENNA®** reflectors attach easily and may be custom imprinted with your logo. They ship 8 per peel apart sheet, with usage instructions printed on the back. Ideal for all auto related businesses including car dealers, gas and repair stations, parking garages, parts stores and more.
